Population Served: 125

Number of microbiological monitoring samples required: 1

Number of microbiological monitoring samples taken: 4

Did an M&R violation occur? Yes No

If "Yes," check reason (s) below:

Actual number of samples is fewer than required

Did not collect/analyze repeat sample

Did not collect/analyze for E. coli for positive total coliform from routine / repeat sample

Did an MCL violation occur? Yes No

If "Yes," check reason(s) below (see also Part 5, Table 6 for Additional information).

For systems collecting less than 40 samples per month: two or more of the samples (routine and/or repeat) are positive for total coliform (= total coliform MCL violation).

For systems collecting 40 or more samples per month: more than 5% of the samples (routine and/or repeat) are positive for total coliform (= total coliform MCL violation).

The original sample was E.coli positive and at least 1 repeat sample was positive for total coliform (= E.coli MCL violation).

Reminder: System must collect a minimum of five (5) routine microbiological monitoring samples during the month following a repeat sample collection.

As required by 5-1.72, "Operation of a Public Water System," a copy of this form shall be sent to your local health department by the 10th calendar day of the next reporting period.

Sample Collector(s): Harry Goldman Water Testing

Name of NYSDOH Certified Laboratory: Pace Analytical

Did any MCL violation occur? If so, please describe: NO

Did an emergency or low pressure problem occur? Did source water bypass an existing treatment process in the system? If so, please explain: NO

Comments: well #1 is not in service — repaired pump show testing results of positive BAC chlorinated well #1 final testing show negative BAC
