TO: The Residents of the Village of Dering Harbor and Village Board

FROM: Jeffrey W. Szabo, Chief Executive Officer, Suffolk County Water Authority *JWS*

DATE: June 14, 2018

On behalf of the Suffolk County Water Authority Board and our employees, I would like to take this opportunity to thank the Village Board and its residents for approving the interim agreement allowing the Suffolk County Water Authority (SCWA) to operate your water system.

We intend to provide the same high level of service to the Village as we provide to all of our roughly 400,000 customers. We take our responsibility as the largest groundwater supplier in the United States very seriously and will make sure all drinking water regulations are met.

Our first official day of operation will be June 15, 2018. After that, you will, from time to time, see representatives from the Authority performing our duties. Our personnel are required to carry official identification so if there is ever a question, do not hesitate to ask to see it. We will be working over the next few weeks to set up individual customer accounts for each property owner. In the meantime, if you have a question or if an emergency arises, we ask that you contact us at the following numbers:

During regular business hours M-F, 8:30 AM to 7:45 PM and Saturday - 8:00 AM to 4:15 PM:
Customer Service 631-698-9500
During all other hours (Emergencies Only): 631-665-0663

Again, we thank you for placing your confidence in the Suffolk County Water Authority and we look forward to a productive relationship.
